

Design the Green Zone Competition 2021

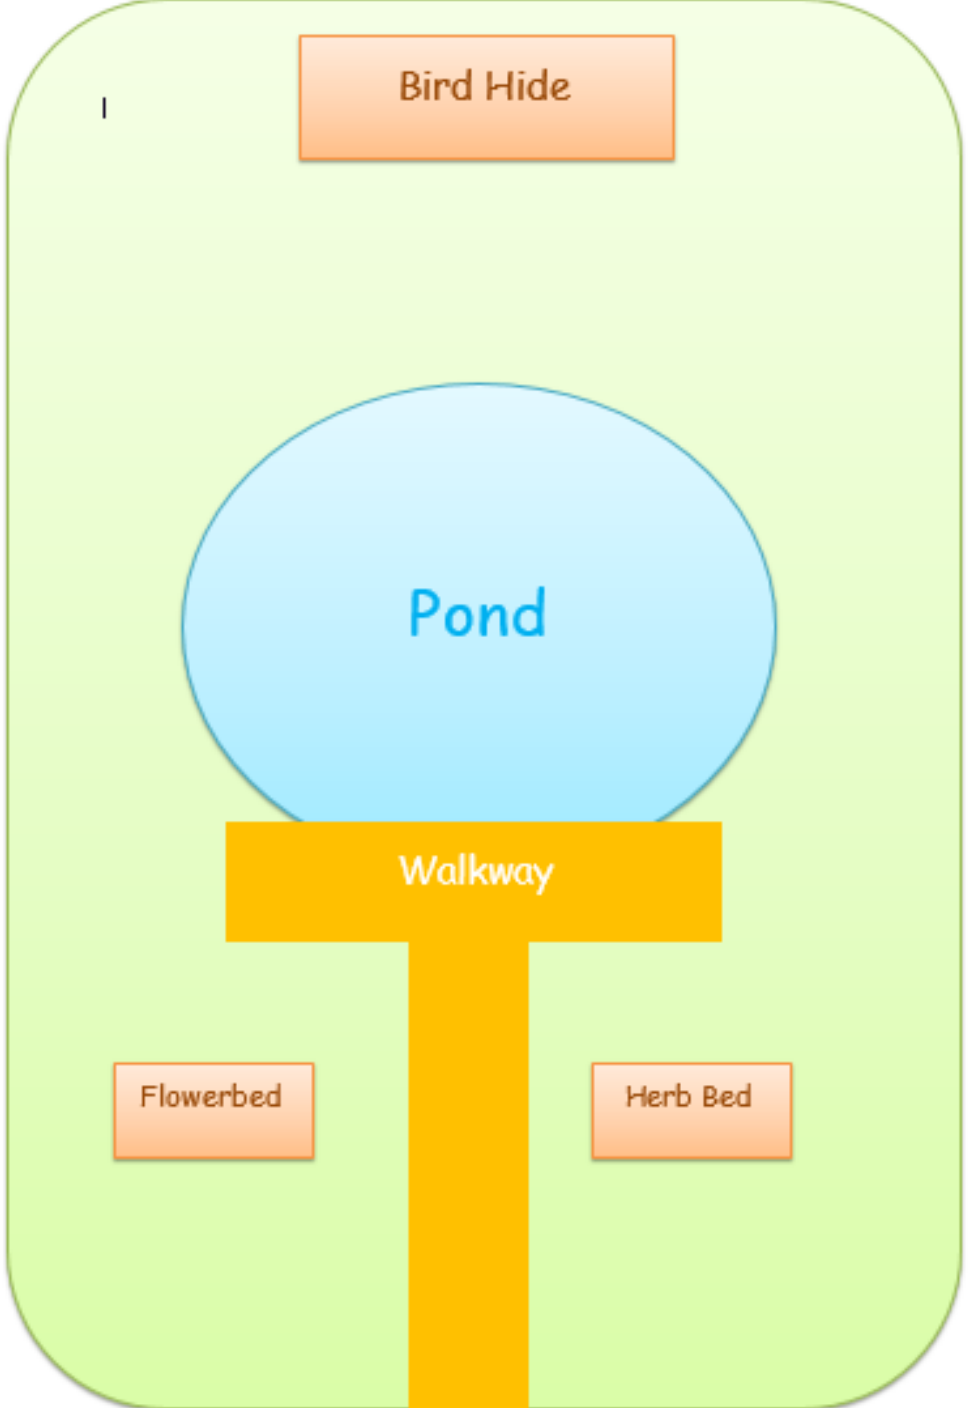

Task

- Your task is to design a plan for the green zone using your ideas of what you want to be there.
- If you are interested, please collect a template of the green zone from the competition box by Mrs Lamy's office. This is so that you know what cannot be moved. You may draw your design on the template or on a plain piece of A4 paper.
- You will need to write your full name and class at the back of your design.
- Your design needs to be handed in by Friday 19th November- you can give your entries to your class teachers or you can give them to Mrs Khan in 6P.
- Winners will be announced the week after.

Purpose

- To increase biodiversity in our school- think about habitats.
- Your voice- how would you like your green zone to look? All ideas will be taken into consideration.

Template of green zone for you to collect.

Our Green Zone now

Some ideas

- bird feeders out
- Composters
- Bug hotels
- sculptures

Biodiversity

What is biodiversity?

- The term means biological diversity and refers to all the variety of life - whether that's plants, animals, fungi or micro-organisms - as well as to the eco-systems they form and the habitats in which they live.

Why is biodiversity important?

- Biodiversity is essential for human health and well-being, economic prosperity, food safety and security, and other areas critical to all humans and all human societies.
- Organisms, ecosystems and ecological processes supply us with oxygen and clean water, they help cycle carbon and fix nutrients, they enable plants to grow, they keep pests and diseases in check, and they help protect against flooding and to regulate the climate.

Prizes

- There will be prizes for 1st, 2nd and 3rd place.
- Certificates to participants.
